REGRADING OF OVERALL VITAL MATERIALS INVENTORY

Discussed with Mr. [REDACTED] Security Office, the downgrading 25X1A9a  
of the overall Vital Materials Inventory, from Top Secret to Secret.  
He said that this appeared to be a question for the newly created  
regrading official [REDACTED] 25X1A9a

25X1A9a I called [REDACTED] and he stated that as we intend to regrade the  
next issuance of the Inventory, and not change an existing inventory, we  
would not have to prepare any formal statement.

As the classification is determined by the office preparing the  
report no further action is necessary. This regrading will not affect  
the National Security Council portion of the inventory which will  
continue to remain Top Secret.

[REDACTED] 25X1A9a
